SUMMARY

AI Automation & Workflow Specialist with 2+ years of experience designing automation systems, AI-integrated workflows, and AI-assisted digital products. I specialize in designing intelligent automation workflows, AI-powered business solutions, and modern digital products that improve productivity, simplify operations, and enhance user experiences.

My work combines automation, artificial intelligence, and user-centered design to transform ideas into scalable digital solutions, backed by 7+ years of freelance work in AI data annotation and quality assurance that sharpens the precision behind every system I build.

I hold a Bachelor of Science in Architecture from the University of Mindanao (2024). My academic background strengthened my analytical thinking, structured planning, and systems design approach, which now supports my work in AI automation and digital product development.

EDUCATION

University of Mindanao

2024

Bachelor of Science in Architecture

PROFESSIONAL EXPERIENCE

Content Moderator | Clickworker

May 2019 – Jul 2026

Reviewed and moderated text and image content according to platform guidelines, and completed search relevance evaluation to support AI model training.

Quality Analyst | Pactera EDGE

Dec 2020 – Jan 2026

Reviewed AI-generated data for quality and guideline compliance, validating annotations against client standards and flagging inconsistencies for correction.

Data Annotator | Remotasks

May 2019 – Jan 2026

Performed AI data annotation and quality evaluation across text, image, and search relevance tasks, including computer-vision annotation such as bounding box, polygon, and instance segmentation.

PROJECTS

SAIFX | AI-Powered Trading Platform & TradingView Indicator

A digital trading ecosystem designed to help traders analyze markets, manage trading workflows, and make informed decisions through intelligent tools and modern technology.

- Product Strategy
- Platform Planning
- Workflow Design
- TradingView Indicator Design
- User Experience (UI/UX) Planning

SyHire | AI Recruitment Platform

An AI-powered recruitment platform that streamlines the hiring process by connecting employers and job seekers through an efficient and user-friendly digital experience.

- Product Planning
- Website Design
- Workflow Architecture
- User Experience (UI/UX) Planning

Mindanao Hives | Real Estate Marketplace Platform

A modern real estate marketplace designed to connect buyers, sellers, agents, and developers through a centralized platform that simplifies property discovery and management.

- Product Strategy
- Platform Planning
- Website Architecture
- Workflow Design
- User Experience (UI/UX) Planning

MomentumMakers | AI Automation & Content Operations Platform

An AI-powered platform that automates content research, planning, production, and publishing workflows to improve productivity for creators and businesses.

- Workflow Automation Design
- Product Planning
- AI Integration Planning
- Website Design
- User Experience (UI/UX) Planning

TECHNICAL SKILLS

- Workflow & Process Automation: n8n, Make.com, Zapier, webhooks, REST API integration, business process optimization
- AI Integration: AI agent integration, AI workflow design, prompt engineering, ChatGPT, Claude, AI Agents
- Product & UX: product strategy, platform planning, workflow architecture, UI/UX planning, Figma, Canva
- Web Development: HTML, CSS, JavaScript, responsive website design, GitHub, Vercel, Supabase
- Data Annotation & QA: image annotation, data labeling, annotation review, dataset quality assurance, AI training data preparation
- Tools & Platforms: Notion, Airtable, Slack, Google Workspace, Microsoft Office, Adobe Photoshop

PROFESSIONAL STRENGTHS

AI-First Problem Solving • Analytical & Systems Thinking • Workflow Optimization • User-Centered Design • Product Strategy • Adaptability • Continuous Learning • Collaboration • Attention to Detail

CURRENT FOCUS

AI Automation • Workflow Automation • AI Annotation • AI Website Design • Digital Product Development • Business Process Optimization
